

PRAVEENA PUSULURI

Palatine, IL 60067 | 224-201-6244 | [Gmail](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data analytics professional with 6+ years building automated reporting, BI, and data-pipeline solutions for regulated financial-services organizations. Deep hands-on expertise in Snowflake, SQL, Python, Airflow, and Tableau/Power BI, with a consistent record of replacing manual, error-prone processes with governed, self-service systems — cutting reporting turnaround by as much as 85% and error rates by up to 40%. Comfortable owning pipeline architecture end-to-end and translating technical findings for senior stakeholders.

CORE SKILLS

Analytics & BI: SQL, Snowflake, Python, Tableau, Power BI, Excel

Automation & Engineering: Airflow, ETL/Pipeline Architecture, Process Automation

Domain Application: Risk & Controls Analytics, Regulatory Reporting, Anomaly & Trend Detection, Decision Support

Collaboration & Delivery: Jira, GitHub, Executive Reporting & Presentations

PROFESSIONAL EXPERIENCE

PRINCIPAL ASSOCIATE, Payments Analytics | CAPITAL ONE Jan 2026 – Present

- Own end-to-end Snowflake ETL architecture processing 7.76M+ records, powering automated BIN inventory reporting across capacity, status, network, and product-code dimensions.
- Built a centralized Snowflake/Tableau reporting ecosystem with automated executive dashboards and real-time monitoring, giving leadership a single governed view of the full BIN landscape.

LEAD DATA SCIENCE ANALYST | DISCOVER Sep 2024 – Dec 2025

- Built automated risk/control analytics that cut manual reporting by 40–60% and turnaround time by 30–50%.
- Developed 12+ Tableau/Salesforce CRM dashboards for risk and complaint monitoring, including a KRI-tracking dashboard used for control-effectiveness reporting.
- Automated risk/compliance pipelines with Airflow, cutting manual refresh effort 50%. Built Snowflake/Python datasets processing millions of records for risk scoring, exception identification, and anomaly analysis.
- Validated re-tiering of misclassified card accounts as part of a portfolio-wide reclassification effort, helping ensure accurate merchant fee structure.

SENIOR DATA SCIENCE ANALYST | DISCOVER PRODUCTS INC. Sep 2022 – Sep 2024

- Built Snowflake analyses, developed Tableau dashboards and automated recurring reviews through Airflow and presented findings and recommendations directly to senior leadership.
- Applied anomaly detection and analytics to internal reviews, identifying risk indicators and process gaps and translating them into corrective-action recommendations.
- Used analytics to identify customer populations impacted by a regulatory consent-order remediation effort, supporting timely and accurate remediation.

DATA ANALYST | DHL Jun 2022 – Sep 2022

- Developed MySQL/Power BI reporting for operational KPIs; automated data-entry tasks with Excel macros/VBA, reducing manual errors.

DATA ANALYST | PRIME SOLUTIONS INC. Apr 2020 – May 2022

- Performed MySQL data preparation and analysis, identifying patterns and business opportunities that contributed to 15% budget savings; built Tableau/Power BI reporting.

DATA ANALYST | GLAXOSMITHKLINE LTD. May 2015 – Jan 2017

- Led self-inspection audits and defect tracking (Jira), contributing to a 10% year-over-year reduction in compliance audit findings; built a testing methodology that cut sampling errors by 15%.
