PROFESSIONAL SUMMARY

Data Analyst Professional with Corporate Risk & CRM Oversight with **6+** years of experience delivering risk analytics, control monitoring, and compliance reporting solutions in financial services and regulated environments. Proven expertise in **Snowflake, SQL, Python, Tableau, Salesforce**, and **Airflow** to build automated risk data pipelines, complaint analytics frameworks, KRI/KPI dashboards, and anomaly detection models. Strong track record supporting internal audit, operational risk mitigation, and governance reporting through data validation, trend analysis, and cross-functional stakeholder collaboration. Experienced in **Jira**-based risk tracking and GitHub-controlled analytics development workflows.

PROFESSIONAL EXPERIENCE

PRINCIPAL ASSOCIATE — CAPITAL ONE | JAN 2026 – PRESENT

- Role continued following acquisition of Discover Financial Services, responsibilities and analytics scope unchanged
- See below **FOR CORE RESPONSIBILITIES AND TECHNICAL CONTRIBUTIONS**

LEAD DATA SCIENCE ANALYST| DISCOVER | SEP 2024 – DEC 2025

- Simplified risk trend and anomaly monitoring by building automated analytics workflows, reducing manual reporting effort by **40–60%** and improving reporting turnaround time by **30–50%**
- Developed **14+ CRM risk and complaint oversight dashboards** in Tableau using **Salesforce** and **SQL** data, to enable continuous monitoring of risk indicators and control effectiveness
- Managed **5–8 concurrent risk analytics and dashboard delivery projects** with high accuracy under tight regulatory and audit reporting timelines
- Translated analytical findings into actionable business recommendations for risk and control stakeholders
- Built and optimized scalable **Snowflake** and **Python** analytical datasets processing millions of records, enabling faster risk scoring, and control gap identification
- Automated **10+ recurring risk and compliance reporting pipelines** using Apache Airflow, improving data reliability and reducing manual refresh effort by **50%**
- Validated control design and operating effectiveness through data-driven testing and analytics, delivering insights to refine risk mitigation strategies
- Implemented automated data validation and quality checks across Snowflake and CRM datasets, reducing reporting errors by **25-40%**
- Designed dynamic Tableau dashboards for real-time control monitoring and KRI tracking, supporting proactive risk management decisions used by **50+** stakeholders
- Partnered with **10+** cross-functional business, risk, compliance, audit, and oversight stakeholders to translate risk monitoring requirements into technical dashboards and automated analytics solutions
- Tracked **50+** risk issues, control gaps, and remediation activities using **Jira**, supporting transparent risk lifecycle management
- Maintained version-controlled SQL and Python analytics repositories in **GitHub** to ensure reproducibility and audit-ready traceability
- Designed 10+ dashboard wireframes and reporting layouts in **Figma** to align technical outputs with executive and stakeholder reporting needs
- Built self-service **Tableau** and **Streamlit** dashboards enabling **10+** business stakeholders to perform autonomous reporting and exploratory analysis
- Trained **15+ analysts and business users** on Tableau and Streamlit self-service reporting tools, improving team data literacy and reducing ad-hoc reporting requests by **30%**

SENIOR DATA SCIENCE ANALYST | DISCOVER PRODUCTS INC. | SEP 2022 – SEP 2024

- Led advanced data analytics projects to perform internal audit reviews including detecting anomalies, identifying potential risks, and optimizing operational efficiencies.
- Examined business processes for potential vulnerabilities, prioritized any observed gaps and supported restitution efforts.
- Collaborated with cross-functional teams, to address audit findings, implement corrective actions, and enhance overall risk management practices.
- Systematically identify customers impacted by natural disasters for application of disaster relief programs.
- Performed in-depth data analysis in **Snowflake** and automated review through **Airflow** to create ongoing evaluation framework.
- Created interactive and dynamic **Tableau** dashboards based on user-defined inputs.
- Presented findings, recommendations, and insights to senior leadership to facilitate informed decision-making, and drive improvements in risk management and governance practices.

DATA ANALYST | DHL | JUNE 2022 – SEP 2022

- Created data reporting of business processes using **MySQL** to create transparency into underlying improvement opportunities.
- Collaborated with cross-functional teams to define data requirements, developed multiple reporting for various stakeholders, and supported data-driven solutioning.
- Developed Power BI dashboards to provide real-time tracking of business KPIs.
- Developed macros to automate data entry tasks, reducing manual errors and improving data accuracy.

DATA ANALYST | PRIME SOLUTIONS INC. | APR 2020 – MAY 2022

- Performed data preparation through data extraction, consolidation, and massaging using **MySQL.**
- Conducted data analysis to identify patterns and to highlight outliers that help leadership decision-making.
- Leveraged data analysis to identify business opportunities and potential solutions, resulting in 15% budget savings.
- Developed business intelligence reporting to help socialize key business metrics using tools like **Tableau** and **Power BI.**

DATA ANALYST | GLAXOSMITHKLINE LTD | MAY 2015 – JAN 2017

- Built hypothesis testing methodology for product sampling that led to an error rate reduction by 15%.
- Developed centralized inventory database that achieved operational efficiency by 9%.
- Led self-inspection audit to proactively identify gaps and tracked defects though resolution in JIRA, resulting in a 10% year-on-year reduction in compliance audit findings.
- Received business requirements from various stakeholders and developed analytical framework to provide related business insights.
- Worked with cross functional teams as a part of process improvement.
- Worked in an Agile environment to develop and deliver solutions to business with a quick turnaround.

EDUCATION

MS IN MANAGEMENT INFORMATION SYSTEMS | DECEMBER 2019 | NIU, DEKALB|

- Major: Data Analytics
- Related coursework: Business Data Analytics (SAS), Social Media Analytics (Python), DBMS (SQL)
- Master in Pharmaceutical ANalysis | March 2014 | JNTU, INDIA|
- BACHELOR'S IN PHARMACY | March 2011 | Andhra university, INDia|

PROJECTS:

- Discover Card Reclassification: Validated re-tiering of misclassified card accounts to help ensure accurate merchant fee structure.
- DSL Consent Order remediation: Worked on multiple analytics tasks to accurately identify impacted customer populations for remediation.
- Control Monitoring Dashboard — Developed Tableau dashboard for KRI tracking and control effectiveness reporting
- Regulatory Remediation Analytics — Identified impacted customer populations for remediation programs using Snowflake SQL analysis

ACCOMPLISHMENTS AND AWARDS

- Achieved "ZERO HERO" award for overall contributions in driving operational efficiency and reducing defects drastically at GSK.
- Received "Spirit Award" for contribution to Internal Audits at GSK.

SKILLS AND ABILITIES

- **Data Platforms:** Snowflake, SQL Server, MySQL, Teradata
- **Programming:** Python (Pandas, anomaly detection, data validation), SQL
- **BI & Visualization:** Tableau, Power BI (DAX, Power Query), Streamlit
- **CRM & Source Systems:** Salesforce CRM
- **Data Engineering & Automation:** Apache Airflow, Data Pipelines, Workflow Automation
- **Collaboration & Tracking:** Jira, GitHub
- **Design & Requirements:** Figma, Dashboard Wireframing, Stakeholder Reporting
